

## Setting up Static field for Quota in OBS Studio

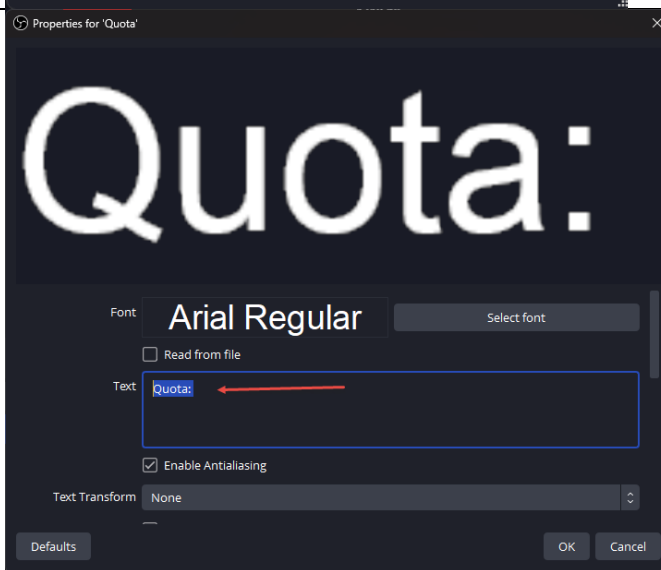

Open up your OBS Studio	
Go under your Scenes section 1. Add a new scene	
1. Name the resource whatever you like. 2. Make sure "Make source visible" is checked 3. Select OK	
Next go to the Sources section 1. Add a new source	

<p>Select the source Text (GDI+)</p>		
<ol style="list-style-type: none"> <li>1. Name the source Quota</li> <li>2. Make sure "Make source visible" is checked</li> <li>3. Select OK</li> </ol>		
<p>Choose Select font</p>		

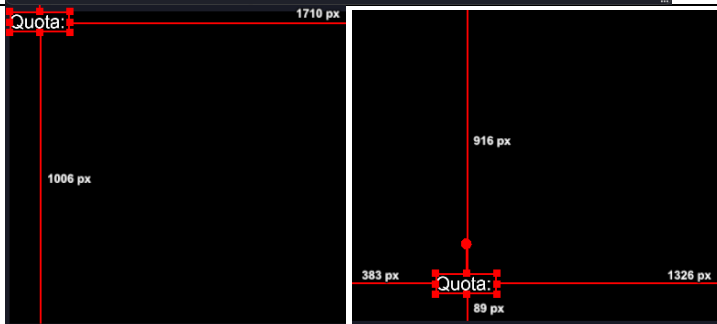

For this example I am going to change font size to 72 and then select ok *(feel free to set this however it works for you)*

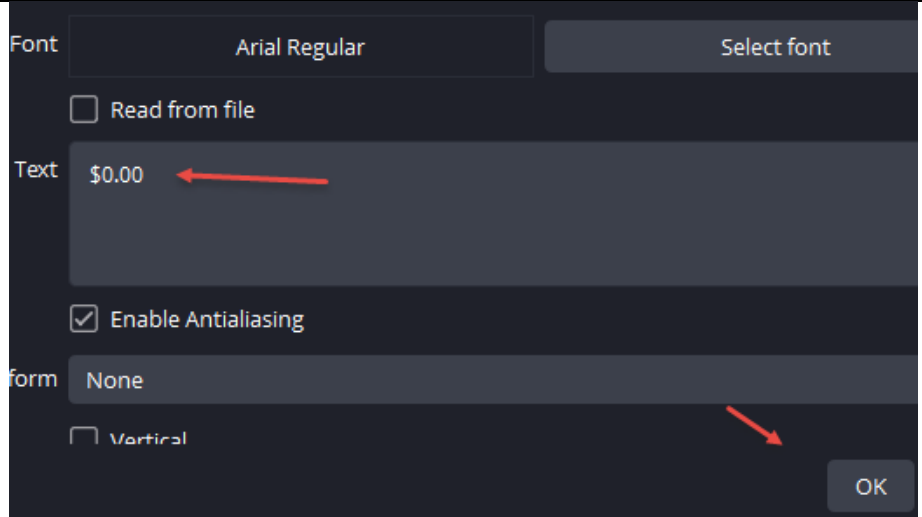

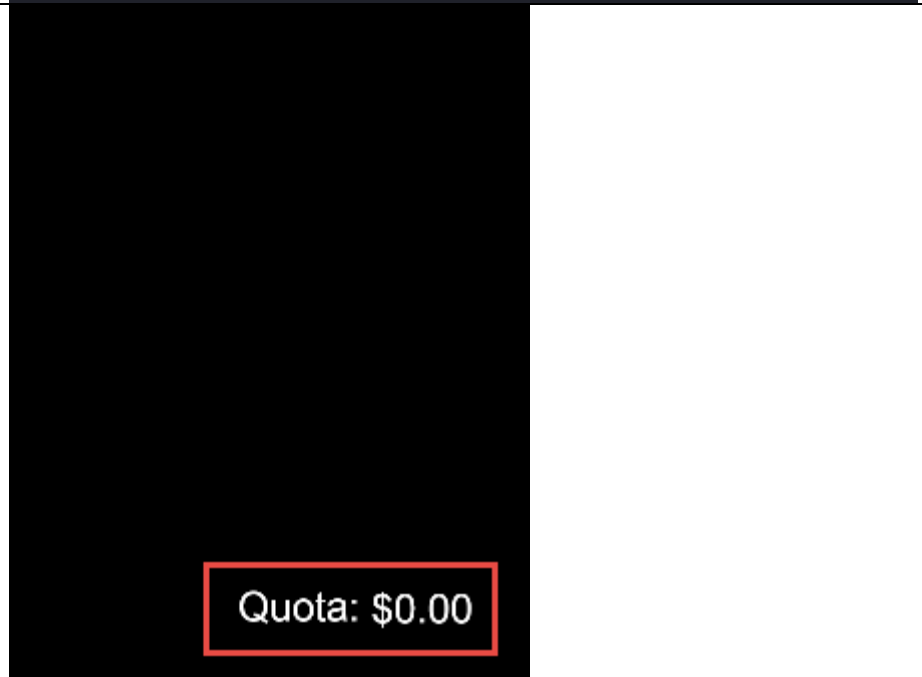

Type in Quota: *(make sure to add a space after the colon to make your life easier later)*  
Select OK

This will add it to you screen above. You can move this where ever you would like on your screen

Next, add another Source Text (GDI+) and name it Quota Amount. Repeat the same steps starting [here](#)

<p>Next in the text field type \$0.00 and select OK</p>	
<p>On the screen above move this field after the quota field</p>	
<p>This part in OBS is now done.</p>	<p><i>Next see documentation to add command in streamer bot to change Dollar amount without having to edit OBS during a live stream</i></p>
